

BLUE CACTUS TEQUILA

Tequila is distilled from the fermented juices obtained from the hearts of the blue agave plants grown in the Tequila region. The liquor gets its name from the town of Tequila located in the state of Jalisco where production started more than 200 years ago. Blue Cactus is fully imported and hand made from the finest 100 percent blue agave, in small batches to ensure its smooth silky taste and subtle flavours. Certain to appeal for those looking for an authentic Tequila experience and the perfect margarita!
