

## VODKA

These are the Vodka Brands to watch. A common misconception is that all Vodka's taste the same, but anyone who has made a cocktail, knows this to be false. The quality of the raw materials used, your distillation techniques and the quality of the bottling will all affect the quality and taste. At D'Aquino's we have been producing vodka for over 30 years and in that time we have learnt all the secrets, plus our unique distillation process ensures the best possible flavour.
