

NEFT - DANGEROUSLY GOOD

You may have seen NEFT before. It is an Ultra Premium Russian Vodka packaged in a barrel, not in a bottle. WHY – Oil was the source of prosperity for the founders of NEFT. Three young Russian Engineers first met in the remote areas of Siberia on the hunt for black gold. Extreme living conditions and brutal hard work took a toll on both mind and body.

How did they survive ? ...Quite simply ... Vodka!

With financial security later in their lives, the oil pioneers decided to distil their own high grade vodka and pay homage to their shared success. They called it NEFT, oil in Russian.

The eventually took their formula to Austria, where they could combine their engineering and technological vision with the purest of Austrian Alpine Spring Water.

FINEST RUSSIAN VODKA – MADE IN AUSTRIA
